

Natural avalanche in the Northern Bridgers

BRIDGER RANGE

Bridger Range

12/30/2018

Code

SS-N-R1-D1-I

Elevation

7800

Latitude

45.92170

Longitude

-110.98500

Notes

Skiers in the northern Bridgers noticed this natural [slab](#) avalanche. From an email: "Extremely weak, faceted snowpack on w-e slopes all the way up to 8000ft or so. Widespread cracking and collapsing, basically a 14in storm [slab](#) on top of total garbage. Observed a good size natural in steep, north facing terrain at about 7800ft, [starting zone](#) was a big slough fan and broke what looked like 2-3ft deep, presumably on the dry spell facets."

Number of slides
