

# Collapsing in Specimen Creek

Specimen Creek  
Southern Gallatin  
2/9/2019  
Code  
SS  
Notes

From e-mail: " Large collapses on any slope with HS of <1m, one pit at 7500 on W [aspect](#) and 19 degrees HS 100 cm, yielded ECTP22 sudden [collapse](#) on advanced [depth hoar](#) 45cm from the ground. Overall just terrible structure. We had collapsing on both E and W aspects. Large shooting cracks. No other avalanche activity apart from large [slide](#) on Ernest Miller from several days ago."

Number of slides  
1  
Number caught  
0  
Number buried  
0  
Avalanche Type  
Soft slab avalanche  
Slab Thickness units  
centimeters  
Single / Multiple / Red Flag  
Single Avalanche  
Advisory Year  
[18-19](#)
