## **Collapses and Whumphs west side Bridgers**

Truman Gulch Bridger Range 1/19/2020 Code Aspect W Latitude 45.85350

-110.97000 Notes

Longitude

From obs: "Took a tour down the ridge dividing Truman and Jones creek Sunday. Snow varied from 12 inches of facets topped with a crust to big solid wind deposits sitting on basal facets to 2 feet of fist and 4 finger snow over a 1 finger crust over more facets. Quite a bit of cracking and whoomphing on westerly and wnw aspects. I avoided the large paths altogether and stayed on the ridge."
