Hyalite canyon, elephant mountain

Date Sun, 02/28/2021 - 21:06 Activity Ice Climbing

This was observed from the genesis area in hyalite. It was on the north east facing Bowl off elephant mountain about 800ft above the un named wall. It looked like it was about 200-300ft across.

Region Northern Gallatin Location (from list) Hyalite - main fork Observer Name Brendan Durrum
