

Surface Hoar in Hyalite

Date

Sat, 11/12/2022 - 17:05

Activity

Snowshoeing

When walking around near grotto falls and below fat and thin chance there was significant surface hoar forming. The crystals near fat and thin chance appeared to be 1mm in size and near the grotto falls parking lot specific areas had surface hoar up to 3 or 4mm in size.

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Ethan Jeannette
