

Climax Path, Natural Avalanche

Woody Ridge

Cooke City

2/20/2023

Code

SS-N-R2-D2-I

Elevation

9900

Aspect

E

Latitude

44.97390

Longitude

-109.92400

Notes

From email, "At 12:45 p.m. I saw Climax run naturally. SS-N-R2-D2-I. The low visibility and distance made it hard to tell how deep the crown was, but based on there not being much volume of debris and it not running very far I'm guessing it was within the new snow/storm interface and didn't step down to any buried PWL."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger

R size

2

D size

2

Bed Surface

I - Interface between new and old snow

Problem Type

New Snow
