

Somewhat stable near The Throne

Date

Wed, 12/13/2023 - 13:00

Activity

Skiing

Aspect was NNE 070 deg. 8100 ft.

85 cm snow depth

First 20 cm from the ground up was large facet, rotting snow.

Remaining 60 cm was consolidated.

No collapsing or shooting cracks noted.

No natural slides seen in the area.

Spoke with another party that was skiing S of The Throne. They heard large collapses while skinning over flat terrain.

Region
