## Zimmer Creek Avalanche

Date Sun, 01/21/2024 - 12:15 Activity Skiing

Remote triggerd a D1 Avalanche from about 150' away. Crown was 1-2' deep. The debris ran onto an apron that was shared with a larger slope which subsequently triggered a larger D2 Avalanche that was about 100' wide with a 3'-4' crown. Lots of cracking and collapsing of the snow pack all day and remote triggered a few other smaller slopes during the day. The snowpack is very sensitive out there right now.

Region Cooke City Location (from list) Zimmer Creek Observer Name Ben Zavora
