Whumpfs in Flanders

Date Sun, 02/11/2024 - 17:40 Activity Skiing

Skied the whitebark glade on Flanders and got several whumpfs at the mid and upper elevations. Light overnight and continued wind loading. There was a recent avalanche that appeared to be a wind slab with decent propogation on a north facing rocky slope. Visibility was too poor to get a good look or photo.

Region Northern Gallatin Location (from list) Flanders Creek Observer Name Florence Miller
