

Dry Loose on Ross Pk.

Date

Thu, 04/18/2024 - 12:20

Activity

Skiing

Skied the Banana Coulior off Ross today. 6-8" of fresh, dry snow has fallen and lies above a bomber crust that was observed on all aspects we traveled on. The weak interface between new, dry snow and the pervasive crust allowed for a large sluff, or dry-loose slide, that began near the top of the Banana Coulior and ran for ~ 500'

Region

Bridger Range

Location (from list)

Ross Peak

Observer Name

E. Webb
