**Slope Angle:** 27°  
**Wind Loading:**

**Stability:**  
**Air Temperature:**  
**Sky Cover:** CLR  
**Precipitation:** NO  
**Wind:**

**HS:**65      **Layer Notes:**  
 25-0cm: Problematic layer

**Notes:** Snowpit location gets partial shade in the afternoon from a large whitebark pine tree. (this location is slightly colder than a typical SE aspect).

Steeper solar aspects around Scotch Bonnet and Sheep Mtn. where generally thinner (HS around 40-50cms), and had less pronounced faceting/ warmer lower 1/3 of snowpack.
