

Good skiing in Beehive

Date

Tue, 12/10/2024 - 13:00

Activity

Skiing

Skied from Beehive into Middle Basin today. On NE-E aspects there was ~25cm of low density snow over a supportive midpack. On SW-W aspects there was 5-15 cm low density snow over a supportive crust. Moderate NW winds were moving snow, but wind slab formation where we travelled was isolated to immediate ridgetop easterly aspects.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

N. deLeeuw
