

**Rasta Chute
Near Lulu Pass, Cooke City
10,100' elevation
SSE Aspect**

HS 140cm

**ECTP22 @ 85cm on
early Dec facets**

A layer of facets that formed in early December is breaking clean in stability tests (ECTP22) about 1.5 feet under the surface. Wind-loading or more snow will make this layer more reactive. Photo: GNFAC
